I understand there is some complaint by the men as to the holding of trains and other things in connection with that. We are trying to get the matter remedied and there will be no cause for complaint when we have got through. The trouble in regard to the shifting of freight arises from the fact that we have from 1500 to 2000 freight cars on the side track between here and Buffalo, waiting to be unloaded and that has caused much of the difficulty. We shall be able to get that right very
