Auburn Bulletin. Largest Daily Circulation in City & County. Local and Miscellany.

BAIRN.—See local on first page.—Green apples are plenty.—The boat race comes off Friday, six P. M.

Some farmers in this section have threshed out their wheat in order to make room in their barns for other crops. The yield and quality both are very good.

Wm. Smithhammer, who has been wanted by the police for a year past, but left town before the officers could find him, was found on Saturday and taken on a body execution.

Another transfer of convicts from Auburn to Elmira, NY in number, is set down for to-morrow or Wednesday. They go, as did the first gang, by Southern Central Railroad...

DEATH OF WILLIAM WASSON.—Another of our prominent citizens has passed away, and the suddenness of the call will fall with startling effect upon the many warm friends of the late William Wasson...

On Saturday he visited Syracuse, and on Sunday was about the house as usual, feeling better than he had before for a long time. But about four o'clock this morning he was taken with hemorrhage of the lungs, and died within an hour...

BOARD OF EDUCATION.—A regular monthly meeting of this body occurs on Tuesday evening.

The Buffalo races begin on Tuesday, with \$25,000 in purses. The Rochester races open Aug. 8. The funeral of the late Julius Earl at Skaneateles last Saturday was very largely attended by residents of Auburn and Syracuse.

Boy WANTED.—To set type. None need apply except he can come well recommended. Apply at the BULLETIN OFFICE.

Wanted.—A competent nurse girl. None without experience need apply. 91 South st. jy28ntf

REMOVAL.—Dr. G. W. Tripp, Dental Surgeon, has removed to the Trip block, Genesee street, next west of old Auburn Bank, 22 1/2. The Doctor's 31 years of practice have been spent in this city. dec13ntf

A Murderous Lubatio. BENSON, THE MURDERER OF DR. COOK, ATTACKS HIS UTICA PHYSICIAN AND IS BROUGHT TO THE AUBURN ASYLUM.

Benson, who killed Dr. Cook at the Canandaigua asylum some weeks since, and was transferred to Utica, has again demonstrated his murderous mania by attacking one of the physicians of the latter institution, Dr. Green. Becoming possessed of a knife, he watched his opportunity, and succeeded in inflicting severe wounds upon the doctor, cutting his head and hands. So desperate was his resistance, that the entire force of attendants and several of the patients had to be summoned to restrain the madman. He has since been transferred to the State Asylum for Insane Criminals, in this city.

Base Ball. AUBURN VS. OLYMPICS. The good fortune which has attended the Auburns in the last two or three games deserted them on Saturday, when the Olympics of Patterson, N. J., got away with them in an hour and thirty minutes by a score of 7 to 5. The visiting club played a strong game with few errors. Their catcher, Farrow, who has been secured by the Auburns, and will hereafter play with them, is a superb player, good behind the bat, a powerful hitter and sure thrower. The pitching of O'Neil bothered the Auburns, who only made three base hits as against eight for their opponents. To-day the club will cross bats with the Ithaca Stars falling to come to time. The following is the score:

Table with columns: Name, R, B, P, O, A, E. Lists scores for OLYMPIC and AUBURN teams.

BODIES RECOVERED.—It is reported that the bodies of Mr. Jeddiah Irish and his young companion, Albert Dayton, were finally grappled in Skaneateles Lake on Saturday, near the point where their boat capsized last Tuesday, in about one hundred and fifty feet depth of water.

It is said that the father of young Dayton had promised to pay a reward of two thousand dollars for the recovery of his son's body.

The bodies were found at about 5 o'clock P. M. Mr. Irish's hands were shot tight, and in their grasp was clay from the bottom of the lake. The body of Mr. Dayton was about five rods from that of his companion—both not more than fifteen rods from shore. The father of the youth was present at the recovery of the body, and took it to New York via Skaneateles Junction, by the train leaving this city at 6:40 P. M. on Sunday.

GOOD NEWS TO THE LADIES. Misses Webster & Strong have just returned from New York with another large stock of summer millinery. Ladies wanting one of those light and beautiful new shape Bonnets, to celebrate this glad centennial year in, (and who don't,) will find this the place to order them. We have the finest French Chapeaux, Straw, Swiss Braids, and those Snow Flakes that trim so beautifully and are so cheap and pretty. Ladies, leave your orders in time and oblige.

Misses WEBSTER & STRONG, jy28ntf, 68 Genesee St.

The State Prisons. Common Sense Prison Management.—The State Prison Constitutional Amendment.—The Advantages of a Non-political Management, over the Present System.

Flow long would the stock of the New York Central Railroad be worth a premium in the market if the management of its affairs was delegated to the intelligent (?) and economical (?) control of a political board? The application of the plain, well-founded common sense principles of government which has made that corporation successful, would make our State Prisons self-supporting, instead of proving a constant and increasing drain on the State Treasury and an incubus on the tax-payers of the State.

The proposed amendment which received the endorsement of the last legislature, and which will be submitted to the people for ratification, will remedy many of the defects of the present system. It abolishes the office of Inspector, and substitutes a single Superintendent of State Prisons, to be appointed by the Governor, whose care and management the penal institutions of this state are given. It provides for each prison of the state a system of accountability and responsibility—by an agent or chief officer with the power to appoint and remove his subordinates, removable only for cause.

This change, with some necessary legislation, providing a sensible mode of punishment, to be administered at the discretion of the proper officers, will afford some hope to the overburdened tax-payers of the State, that at least a proper effort will be made to relieve them from the support of idle malcontents. Men of ability will accept places under such a system, finding an incentive to exertion in the guaranty of permanency and appreciation of conscientious effort in what is properly one of the noblest of callings—the protection of society from the ravages of crime, and the reformation and re-education of the unfortunate committed to their care, giving as it does, scope and opportunity for the exercise of the highest faculties of the human mind. A commendable rivalry will exist among the different penal institutions of the State, and economical management and good discipline will be more easily secured.

While the proposed amendment is not, in the opinion of many of the best informed on the questions of penal management, as perfect as it might be, still, it is a great improvement on the present system, and will secure a plan by which each institution will be placed under the control of a responsible head, who can be held to a strict accountability in the discharge of his official duties. That is a great and necessary point gained. It is, however, in my opinion, to be regretted, that in the plan suggested by the Constitutional Convention of 1867, a commission of five persons, instead of a single superintendent, was not provided for in the amendment.

Such a proposition was introduced in the Legislature of 1875, and was the minority reports of Hon. C. C. Dwight, a delegate from Cayuga county, to that memorable Constitutional Convention of 1867, which was adopted by the Convention after an able and exhausting discussion, in which some of the most distinguished members of that body participated.

Mr. Dwight supported the proposition in a speech, which evinced a thorough and extensive knowledge of the subject, and was sustained in his position by a large majority of the Convention. That proposition contemplated the gratuitous service of the ablest and most devoted friends of philanthropic science on a board of State Prison Inspectors.

It was the opinion of that Convention, as it was of the leading members of the Prison Association, that the magnitude of the work, and its great importance demanded the time and ability of more than one man; and I am yet to be con-

vinced that they were not entirely correct in their estimate of the importance and magnitude of the work. Great progress has been made in the past few years in the cause of penal science, and New Yorkers should be proud of the fact that in no other State or country has the cause of philanthropy found other or more unselfish devotion than in our own. We have kept fully abreast of the advanced thought of the world. Our Prison Association, our State Board of Charities are noble institutions and justify our pride and boast. In national and international Congresses we have taken most important parts. It was the genius of a son of New York, that shaped for his adopted State the grand system of criminal jurisprudence and penal management that has been so long the glory of Louisiana. Far in advance of his age, time has verified the soundness of his original views and the wisdom of his policy. It remains for us to profit by the accumulated wisdom of many years of observation and reflection as embodied in the proposed amendment, and to see that it has, at least, a fair trial.

Mawkish sentimentality that would make our prisons play-houses, finds no sympathy with the intelligent philanthropist. White it may be admitted poor economy that would make them sources of profit at the expense of the cause of reformation, it is equally true that it is wrong to ask the already tax-burdened people of this State to pay for deficiencies caused by official mismanagement. Rigid discipline is necessary in the work of reformation. The first lesson for a convict should be that of obedience to rules and regulations. The conquering of bad nature and the repression of evil motive is much easier attained under a strict state of discipline, a desideratum, under the present system, unattainable. Within the past six months there have been removed from the Auburn prison about one hundred officials—some of many years experience and proven ability, because the impetuous demand of party friends must be satisfied, and places made for their followers and henchmen. There is a premium on incompetency. A visit to the halls of the prison, at any time during the February and March meetings of the Board of Inspectors, would have satisfied any candid person of the necessity for reform in the system. No sooner does a change take place in the political complexion of the Board of Inspectors, than every seedy and impecunious loafer in the vicinity turns his face towards the great blue limestone building on State street, looking into the imperturbable face of Copper John for a smile of encouragement.

And what is generally the manhood of hope proves the Mecca of unworthy aspirations. The prisons have become "saints' rests" for political hummers and vagrants, and the obliging tax-payers of the State "pay for the whistle." In a political point of view, the possession of the prison patronage is a curse to the party controlling it. There are twenty to disappoint, and one to please.

Let us try the proposed amendment, relieving the politicians of both parties from the harassing cares connected with the dispensation of prison patronage, is the hope that our penal institutions will become, under the more sensible plan of accountability and responsibility, worthy of the Empire State.

BASE BALL NOTES.—The revived interest in base ball in this community is our excuse for inflicting the following gossip upon such of our readers as do not "tumble" to the newly fledged sensation.

It is understood that the Stars, Ithaca, Ithaca and Crickets of Binghamton, are entered for the Herkimer prizes: \$500, \$300 and \$200. It is also rumored that the Lowells and Buckeyes are in.

The Syracuse Courier pretends to sit in judgment over the Auburn nine, as follows: In regard to the Auburns, despite the fact that in their nine are some of the best players to be had for money, we sorely expect to see them make a very brilliant record. The men have been selected at random, without any discretion, and without any respect for the positions they are intended to fill. They have four catchers and as we understand, no pitcher, who is worthy of the name. There are several other discrepancies, which need to be looked up. Any club in the country could get some good material out of the Auburn team, but unless somebody takes hold of it and amalgamates its parts, we don't expect to hear

of its accomplishing anything extraordinary. One would think from the frequent successes of the Auburns are receiving strengthen their nine, that they have the resources of a nation bank at their command. This, rather guess, too, is a fact, as we understand that one of the foremost men in one of Auburn's most solid banking institutions is at present riding the base ball hot and, per consequence, his portfolios are wide open in the interest of the game. Farrow, we caught for the Olympics of Patterson, N. J., when in this city last week, will hereafter play with Ithaca from the "loveliest village in the plain." His salary is something like \$125 per month and pence paid. Manager Brackett allowed the Olympics to Auburn Friday to negotiate with Farrow looking to an engagement with him to play with the Stars, but some "book or crook" our emerald lost him. It was a golden opportunity, as Farrow was just man the Stars sorely need.

The Rochester Democrat writes: The Olympics of Paterson was beaten by the Rocheat 5 to 3, on Saturday laid out Auburn 7 to 5. Now let Auburn come up here and we'll repeat the dose.

A drunken man boarded Thursday evening train for Syracuse at Savannah. When the train reached Port Byron the conductor noticed that the passenger was missing. He told agent Kelly of the circumstance, and Kelly sent men up the track with a hand in search of him. They had gone about a mile and a half when they found him lying by the side of the track fast asleep. They awoke from his slumbers when he anxiously inquired where he was and he came there, seeming to have recollection of his perilous adventure. He did not appear to be any further than a slight scratch the nose. Had he been sober, fall from the train would have killed him.
